

(Extra Ordinary) Project Manager Digital

We are looking for the best people around to grow together!

About My Real ID

With the platform "My Real ID" we change the way the application process for real estate takes place. My Real ID is the only complete digital solution on the market for applicant communication from initial contact through marketing platforms to rental/purchase contracts.

After the successful investment of more than 60 years in the technical solution itself, the main focus of our activities now lies on the expansion of the customer base and the further development of the "My Real ID" product family.

How we work (Buzzwords)

- Agile, GIT, JIRA, Confluence, Slack, etc.
- We run our own data center (no AWS or Google)
- Reporting, KPIs, Goals, Sprints, Hotfixes, etc.
- symfony3, RESTful API, node.js, 200/404/403/500 (*ouch*), etc.
- Apache, nginx, Port, SSL, MIME-Types, Headers, IMAP, JSON, CSV, FTP, etc.
- Varnish, eTags, .htaccess, mod_expire, Performance, TTFB, Abstraction, Backward Compatibility, etc.
- **add a big portion of passion and a strong will to change the world!**

Let's make it short

Have a look on our status quo please:

<https://www.myrealid.com>

And watch our video please:

<https://www.myrealid.com> > Click Video

If you have always thought, that it takes extra for being extra, then we might be a match. A strong team (also with a lot of fun) but extremely focused and motivated in changing existent structures and procedures! (name it „disruption“, we call it evolution!)

We are happy to answer your questions!

Some facts

- We are located in Munich
- We are looking for people who are willing to form My Real ID and take responsibilities
- We want the best and/or bringing out the best of you!
